## PUBLIC HEALTH ANNOUNCEMENT

WITH RESPECT TO COVID-19 ALERTS AND THE CONCERNS OF THE GENERAL PUBLIC, WE ARE OFFERING SOME DO'S AND DON'TS WHILE KEEPING THINGS CLEAN AND SAFE IN YOUR HOME. YOU MAY BE SPENDING A LOT OF TIME AND SPACE TOGETHER.

**DO NOT mix multiple cleaning products together!!**

Many chemicals can be volatile when mixed together becoming noxious and vaporizing in your home possibly making you ill or even passing out.

**AMMONIA and BLEACH products are fine, however, DO NOT mix these together or on the same surface.**

**DO NOT wash the towels or rags together either!**

You will create a serious vapour that is very dangerous especially in confined spaces such as bathrooms and laundry areas. Wash BLEACH rags and towels SEPARATE from AMMONIA rags and towels. If this happens, ventilation is key. If need be, call a professional for advice. If feeling ill, call 911.

**If you run out of cleaning product, use 100% VINEGAR or 100% LEMON JUICE separately or together.**

These are safe and effective products to use.

### **INFORMATION IS KEY! THERE ARE MANY CLEANING COMPANIES IN KAMLOOPS THAT CAN ANSWER YOUR QUESTIONS.**

I would also like our public health officials to consider the 1000's of frontline certified cleaning professionals that have the knowledge, skill, and equipment to aid in the battle against COVID-19. If this continues to upscale, the cleaning industry is ready to step up. I'm strongly suggesting to our health officials to consider this option especially in light of the recent aid package offered to our provinces.

**To all our clients and anyone who has questions, call anytime 7am to 7pm. Information is FREE.**

THANK YOU AND STAY SAFE.
